How Do You to Turn a Breakthrough Innovation into a Billion Dollar Business?

David G. Thomson, Marshall Goldsmith (Foreword)

Microsoft, Google, eBay, Staples, Genentech, Starbucks, Nike and Harley Davidson . . . these are just a few examples of an elite group of companies that have managed to turn billion-dollar ideas into billion-dollar businesses. What did these and other high-growth companies do to achieve such a goal? What blueprint do they follow to produce such results? Based on three years of in-depth research, David Thomson's *Blueprint to a Billion™: 7 Essentials to Achieve Exponential Growth* provides the first quantitative assessment of the success pattern common across a distinct group of 387 "Blueprint Companies" - the 5% that have IPO'd since 1980 and grown to $1 billion in revenue. They represent America's highest growth companies; they uniquely achieved exponential revenue growth and returns.

This book is not about one unique company, its innovation, and the financial returns it achieved; it is about the quantifiable, success-based pattern - independent of economic cycles or industries - shared across this group of 387 elite companies. It's about how you can use seven common essentials to better your business, organization, team, or yourself and produce exponential growth. It's about executing the essentials and linking them. It's about taking the actions that matter while avoiding pitfalls. While the book is based on quantitative evidence, it provides insightful analysis and very personal stories from many Blueprint Company leaders. It's about taking the actions that matter while avoiding pitfalls. The 7 essentials explored are:

Essential #1: Create and Sustain a Breakthrough Value Proposition
Essential #2: Exploit a High-Growth Market Segment
Essential #3: Marquee Customers Shape the Revenue Powerhouse
Essential #4: Leverage Big Brother Alliances for Breaking into New Markets
